Hello guys, I am an artist, and I just got my "DS-12" DAW for Christmas, and I am so excited. I have been wanting to do some sound stuff for a while now, and I am finding it really hard to get going with it. I feel like I am at a loss as to what to do next and what direction to take my art. I know most of you have read all of my files and have seen my texture work, but I don't know if any of you know who I am or not. I just got a Creative Audigy sound card for Christmas, and I have been having a hard time figuring out how to use it. I know that sounds stupid, but I have no clue how to play around with it. I can't even figure out how to get my files into the program. I tried to import them from Audacity, but the program just stopped working. I would appreciate some assistance. If anyone can help me figure out how to get my sound files into the program, or if anyone can help me get a good program for sound recording/editing (I am only looking for a noob program right now.) I know that the description may sound stupid, but I have looked everywhere for a program. I have downloaded Ableton Live, and I have read some stuff about it, but I haven't done anything with it. So If anyone can help me, I would really appreciate it. Again, thank

you very much for your help. Marcelo 0 comments Hey Marcelo, welcome to the Creative Soundblaster board! We're glad to help you out with your Creative Sound Blaster DS-12, we have a lot of members that are also new to sound effects and music on the board, and to make things easier, we've started a new "help section" where our staff are available for help on a daily basis. All you have to do is click on the button that says "ask for help" in the bottom right hand corner and we'll help you out, we're always here for you guys! The best program for you to edit your files (audio and video) would be Adobe 82157476af
